Excellent Material

WITH the British Games, incorporating the Inter-County Championships and sponsored by the *News of the World*, being blessed with fine weather, it was to be expected that there would be some excellent performances, and so it proved.

This is invariably an interesting meeting, for we have athletes coming from far afield who get little opportunity to compete in top class company, and whose local facilities are not always of the best, which means that a break-through is often likely by a comparatively little known athlete.

Particularly pleasing was the form shown by the half-milers. Once a British preserve, we have not had many really international class men in recent years, but now we have a crop of really promising young sub-1.50 runners to challenge John Boulter and Chris Carter. As well as those on view over the week-end we have Jim Johnson and David Wright to make up a fine pool of runners, the best of whom could be a challenge to Europe's finest in Budapest later in the year.

Unfortunately, another traditional British event in the mile is sadly lacking in sub-4 minute material. When Ray Roseman hotted things up in the middle stages of the final, only Alan Simpson and John Whetton showed to advantage and there was no real challenge from the remainder.

Summing up the other events briefly, Barrie Kelly and Lynn Davies seem likely to pursue a healthy rivalry during the season—though without being a threat to Wieslaw Maniak in

Budapest. In the longer sprint it was good to see Adrian Metcalfe back to form—maybe it will bring his confidence back too. In the "quarter" we are obviously going to have an embarrassment of riches, particularly if or when Adrian Metcalfe joins in. The selectors may find this the most difficult event of all, but the standard will be high and our 4x440 relay team really good.

Geoff North has shown what he can do on the track before, but only spasmodically and not in a race of this class; the excellent time should inspire him to even greater things. It was good to see Bruce Tulloh at his best again; just what would have happened but for the unfortunate falling of Ron Hill and Alan Rushmer we shall never know. Whether Bruce can reproduce this sort of finish in a faster race is something we shall find out later, perhaps in the match against U.S.S.R. in a fortnight's time.

Maurice Herriott must be pleased to find his shadow, Ernie Pomfret, really fit again. They make an ideal team pair and their time was unusually good for so early in the season. Dave Hemery is obviously going to keep the hurdlers on their toes, whether he goes for the "highs" or the longer event.

Unfortunately the field events did not live up to the high standard of the track events; there were a few personal bests but the standard generally was depressingly low and except for Lynn Davies and Fred Alsop gives us little hope of points to be gained in international competition later in the year.

NEW WEIGHTS FOR THROWING IMPLEMENTS?

Dear Sir,

Five years ago a change was made in A.A.A. Laws for javelin throwing. Previously Juniors had thrown the 700 gram implement, but since 1961 they have thrown the 800 gram javelin. This change was requested by the Javelin Club after extensive study and experiment because they felt sure it would benefit our young throwers technically, providing an implement better suited to their capacities and decreasing the risk of "javelin elbow". I do not think there is any doubt now that it was a wise move, and it is probably no coincidence that Senior javelin standards have risen in the past few years.

It has recently been made evident that there is a wide-spread and growing feeling amongst coaches in other throwing events that the present scale of weights of implements for young throwers is not ideal. Perhaps the biggest objection is to the big jump from 12lb. to 16lb. in the hammer and shot when the thrower moves into Senior ranks. The majority opinion in the Hammer Circle is that (1) this change involves a virtual re-learning of the event from the point of view of technique, and (2) that Juniors are deterred from continuing as Seniors because of their inability to cope with a 33½% increase in weight, and (3) that these two factors lead to a regrettable wastage of young hammer throwers. Similar views are expressed by coaches in shot putting, while many discus coaches think it wrong that Youths should use the 1 kilo discus which is considered appropriate for girls who are two years younger.

This problem has been discussed recently in all its aspects, firstly by the Specialist Clubs Committee, then at an informal meeting which I called and at which there were representatives of the specialist clubs concerned, of the English Schools' A.A. and of the manufacturers, and then subsequently at a meeting of the A.A.A.'s Schools' Consultative Committee at which there was an even wider representation which included organisers of physical education.

These meetings did not lead to any jumping to conclusions; but they did result in a unanimous recommendation that experiments should be made in an endeavour to establish whether a "stepping up" of the weights of implements would benefit our younger throwers. We want to interest youngsters in the throwing events; we want them to enjoy throwing whilst in their 'teens'; we want them to learn a correct technique from the start and to have implements to throw which demand such a technique; and we want them to progress into Senior ranks equipped to throw the full size discus, shot and

hammer. (I wish to stress that the representatives of the English Schools' A.A. at our meetings were as keen on the last of these points as were the rest of us, thus refuting the accusation which is sometimes levelled at them that their only concern is to produce athletic prodigies in whose future in the sport they have no interest.).

We wish, therefore to promote experiments in which A.A.A. Junior throwers train and compete using 1.75 kilo discos and 14lb. shots and hammers. (Where the latter are concerned we have chosen 14lb. because implements of this weight are readily available; but we have not dismissed the possible alternative weight of 6.25 kilos which is used on the Continent and which is 4oz. less than 14lb.) We also wish experiments to be made in all three events in which Youths train and compete with the implements at present specified for Juniors, and also in which Boys use the present Youth implements.

It is appreciated that a young thrower cannot be expected to do himself justice in competitions with two different weights of implement during one season. It is therefore envisaged that the throwers who take part in this experiment shall not start throwing the heavier implement until after their major competitions of this season, i.e. in July or August. It is planned to stage competitions in the autumn which will provide an incentive both for the athlete and for the coaches supervising them.

I wish now to ask for the co-operation of Honorary Coaches in the throwing events who are willing to assist in this experiment. It is not essential that they should be coaching youngsters in all three age groups or in all three events concerned, but the greater the coverage they can offer the better. Nor is it essential that they should have top class throwers amongst the athletes they are coaching; a wide range of ability is desirable as we must consider the implications of the possible changes where all young athletes are concerned.

I would be grateful if coaches who volunteer to help would kindly write to me as soon as possible at the A.A.A. Offices, 26 Park Crescent, London W.1., stating (1) the throwing events in which they coach and in which they are qualified, (2) the number of their athletes in each age group and in each event who would be willing to take part, (3) the range of ability of those athletes, and (4) the period during which the athletes would use the heavier implements under their supervision. It will be appreciated that we shall have only a limited number of 14lb. shots and hammers and 1.75 kilo discos which we can loan out for this purpose. There should, of course, be no problem where the use

of heavier implements by Youths and Boys is concerned, as these are already available.

When I have reviewed the offers of help received in consultation with a representative of the English Schools' A.A. I will contact all the coaches who have been kind enough to write to me and put the plan into action.

Yours sincerely,

Barry Willis,
Honorary Sec., A.A.A.

NOT UP TO STANDARD

Dear Sir,

I was always under the impression that tracks had to attain a certain standard before being used for County Championships. A number of things I saw yesterday (May 21) made me wonder if this was true.

During the past few months certain improvements (?) have been carried out at Palmer Park. The result yesterday:—

(1) The hammer was thrown from the discus circle (no inset),

(2) The long jump run-up was so patchy that the grass at the side was used.

(3) The P.V. box was in three pieces by the end of the competition.

(4) The T.J. run up was so loose that anybody taking off short of the board dug a hole at least 3in. deep.

(5) The steeplechases (2000m & 3000m) were not held for two reasons. A run-in of cinders had been constructed for the water jump and as a result the height of the barrier increased by at least 3in. And floating on top of the water were four threadbare mats.

As usual there were a number of late entries. I would mention that I am making these points as an individual and not as Fixture Sec. of Reading A.C.

Yours faithfully,

D. L. Busst

LAST WORD

Dear Mr. Editor,

This is the final word from the B.M.C. on the current controversy. It is true that Brian Fernée and his brother were invited to run the

day before a race organised by us because of late withdrawals. This does not alter the fact that they wished to be informed of other races. As "there are plenty of mile races" this is a contradiction of Brian Fernée's statement.

I see no harm in quoting from athletes who have trained with Brian Fernée. The word "tout" means "to solicit". Their views came from them voluntarily.

James Mulherin's pompous observations are based on the assumption that Igloi is virtually infallible. No coach is this. It is a poor sport indeed if one cannot make comments on a coach's methods without being assailed. In an article on Igloi in the *BRITISH MILER* of May 1965, I said in view of his **depth** of success with milers his methods commanded great scrutiny.

I have talked with Gordon Pirie over training methods on several occasions. I am surprised that he should make such a rash statement that **ONE TRAINING SESSION A MONTH** on the lines mentioned would "destroy the runners who use them". I cannot trace any mention of **shorter** intervals and more repetitions being mentioned in the correspondence; it certainly was not suggested in the training competition programme. I do not think that some of the methods Gordon practised would meet with approval today. "I once ran for 5 hours until I collapsed in a field and lay there until dark," he recalled to me in 1964. This requires guts and if he believed it did him good then, good luck. Many people believe that a training competition **ONCE A MONTH** does them good; good luck to them, too. In my talks with Gordon, I learnt a lot. Isn't this what coaching and training is all about, i.e. learning a lot.

P.S. Lydiard, Cerutti, Gerschler and Stampff have all produced great milers. Whose methods were best?

Yours sincerely,

Frank Horwill,

VOLUNTEERS WANTED

In co-operation with the Dept. of Physical Education, The Polytechnic, London, Arthur Winter has been asked by a Medical Officer attached to a London hospital who is conducting research into the effects of physical effort and the haemoglobin content of the blood, if any intending competitor in next week's Poly. Marathon would consent to have a blood sample taken shortly before the race, immediately after the race, and then a few days later.

Would any volunteer please phone A. E. H. Winter (CUN. 6727).

The Old Rutlishians have room for two Old Boys' teams in their 12-sided match at Merton Park on Tuesday, July 12th. It is a one string match with five field events and track races up to two miles plus a medley relay. Phone Brian Cox, DERwent 1898.

Bull Jumps Higher Than Ever In BUSF

THE strong wind hampered most of the track events at the BUSF Championships at Birmingham on May 20th/21st and thus many of the best marks came in the field events. Mike Bull (19) added half an inch to his Irish record with a vault of 14'6½"; Graham Hamlyn (19) triple jumped a legal 49'2½" (the classic 15 metres) for 9th place on the UK all-time list; and Mike Sharpe (20), helped by the wind, leapt over 24ft. *Note: Bull improved to 15'0" behind Dave Stevenson's UK record of 15'3" in Dublin on May 25th.*

Irish Notes

By BRENDAN DEARY

QUEEN'S University's John Kilpatrick has been showing good early season form. On May 7th he clocked 21.7 for the furlong, two-tenths faster than Gerry Carson's native record. The time will not be forwarded for ratification as it was recorded at a closed meeting between the University and Stranmillis TC. At the same meet John also won the 100 (10.0) and high jump (5'4").

Mike Bull's recent 14'6" was achieved at College Park, Dublin and not as published in the May 14th issue.

Ballinasloe-Galway Road Relay, May 1st. History was made by this 6-stage, forty mile road relay between two AAUE teams (Donore "A" and "B") and two NACA teams (Derrydonnell and Co., Galway). The race attracted great crowds *en route* who saw Donore headed for only the briefest of spells on the first leg after which they gained on every stage. The most surprising aspect of the race was Donore "B" team's indisputable second place. The event, ably organised by Derrydonnell, could go far towards repairing Ireland's athletic split. 1, Donore (W. Dunne 34.37, T. Hopkins 36.18, A. Murphy 33.50, B. Messitt 32.45, J. McNamara 31.28, T. O'Riordan 35.27) 3h.23m. 25s.; 2, Donore "B" (T. Redican 35.28, P. Keough 36.16, J. Dunne 35.07, D. Byrne 35.08, M. Connelly 34.02, E. Spillane 38.53) 3:34.58; 3, Derrydonnell (J. Crofty 37.25, W. Morris 36.32, K. Ryan 34.30, P. Madden 36.53, T. Flanagan 36.12, T. Madden 39.15) 3:40.47; 4, Co. Galway 3:48.25.

FIRST LONG DISTANCE WIN BY DAVE VICKERS

DAVE VICKERS (25) won his first long distance road race when winning the Bury and Radcliffe 21 miles event (actual distance 21m 1350y) on May 14th. In an exciting finish Vickers held off team mate Brian Jackson, who had led throughout.

Warm weather, hills and a slight headwind resulted in slow times for the first five miles, Jackson, Standring and Sawford passing through in 28.44. At the half-distance (60.37) Jackson and Standring were 46 seconds ahead of last year's winner, Dennis Hopkinson, with Vickers fourth, having moved up from eighth at five miles.

By fifteen miles (84.53) Jackson had dropped Standring and was 23 seconds clear with Hopkinson a further 16 seconds back. At this stage Vickers was still fourth, 97 seconds behind the leader. With 2½ miles to go Jackson still held a lead of 200 yards from Hopkinson, who was now second. A heavy-legged Standring was quickly passed by Vickers.

With just 1½ miles left Vickers had moved to within thirty yards of Hopkinson, but Jackson seemed out of reach. Jackson, his strength sapped, folded however, and Vickers caught him with just yards remaining. After crossing the line Jackson had to receive medical attention, as he was completely exhausted.

THE ATHLETICS SET-UP IN

Tom McNab and Tony Ward report on a recent visit

WE walked along the platform of the Golub-wyna station at six-twenty a.m., 18th March gazing somewhat bleakly at the bustle of Warsaw going to work. Not far away, dominating the skyline, was the Palace of Culture, dubbed by the Poles, none too affectionately, 'Stalin's Cake'. Outside the station we stood, uncertain for a moment, when a neat, lean, smiling figure in a brown trilby stepped forward, ready to shake hands.

'My name is Starszynski' he said. Our fact-finding trip to Poland was under way.

Some forty-eight sleepless, North Sea gale-strewn hours earlier we had left London. Fourteen of those we spent in West and East Berlin. In the West Zone we met Heinz Cavalier, member of the German Federation and editor of that brilliant track magazine, *Leichtathletik*, who conducted us on a swift taxi tour of facilities in the modern, well-to-do city. The Deutschland Sportshalle, virtually a West Berlin 'Wembley' which had a permanent cycle track and a 190-metre indoor track laid specially for athletic competitions; the immaculately kept indoor Olympic Stadion (a real pilgrimage for Tom this, scene of the Riefenstahl film classic of the 1936 Games), used only for about three track meetings a year but kept in superb condition for visiting tourists; two district sports halls.

From observation and interview it was clear that the long tradition of multi-sports clubs has obviously provided a solid basis of facilities, both outdoor and indoor. We visited the Schoneberg Sportshalle, a district sports hall—one of five in West Berlin. This is a multi-sports centre including facilities for outdoor track and field, swimming (indoor pool), cycling in the cyclodrome opposite, gymnastics, roller-skating, indoor athletics—both training and competition. Lecture rooms and restaurant etc. are attached. There is a 120-metre circular track (not permanent), a 60-metre sprint straight and sunken pits for high, long, triple jumps and pole vault. There are facilities for 1,500 spectators. Around such centres are the clubs. We visited the 70-year-old multi-Summler Sports Club. It has 2,500 members, 800 of whom are involved in track and field. Cost of membership is about £5 per year.

Obviously the Germans are well endowed with track and field facilities and though their "Golden Plan" has dropped behind schedule it is proceeding steadily towards its goal.

The German coaching scheme, on the other hand, is almost self-creative. There are only four professional National Coaches in the Federal Republic. Toni Nett is employed as the technical expert with the task of collating, translating and

assessing training information gathered from all over the world. He does no practical coaching. Other coaches are Schmidt (Middle-Distance); Simon (Pole Vault); Muller (Women's Pentathlon). The German Federation hope to appoint other professional coaches in time.

Apart from this there are no other qualified coaches, no examinations. Anyone wishing to coach goes along to the local club to assist and he establishes his standard by the quality of his work and the time he spends in coaching.

Our visit to East Berlin was somewhat handicapped by the fact that we were unable to contact, by telephone, officials of the East German Federation. We made our own way to the Dynamo Sportshalle and had to proceed with some caution. This sports hall is similar to the Deutschland in West Berlin and Wembley in London but it is used for training for many sports, as well as for competition. In this hall is housed, though not permanently, the fast, 143-metre (11½ to the mile) banked, oval track on which Siegfried Herrmann clocked a world indoor best of 7 minutes 49 seconds for 3,000 metres. Many lecture rooms and small halls surround the main hall in addition to a swimming pool.

It's all systematic . . .

And so, to Warsaw. Just two hours after our arrival in the Polish capital our first interviewing session began, with the famed triple-jump coach, Starszynski . . . despite the fact that we were by then some forty-nine hours without sleep. The session was the first of a number of such sessions that we had with Polish officials and interpreters, totalling some twelve hours in all. We found Tadeusz Starszynski a fascinating man. With a squad of triple jumpers which any coach in the world would envy—Schmidt, Malcherczyk, Pulawski and a youthful pretender, Taperek, he controls the destiny of Polish triple jumping. He has tabulated over the years a vast amount of documentation on his jumpers. For some time to come we shall remember this dedicated, imaginative character spreading out his hands and saying, repeatedly: "It is all systematic." Systematic: a word that perhaps epitomises Polish training for all events.

They were five enlightening and, in some ways, surprising days that we spent at the Sports Academy. The food was excellent, as were the indoor facilities. The lightness of the training came almost as a shock. Everywhere we went we found friendship, helpfulness.

Lack of space prevents us from dealing fully

Jozef Schmidt, the greatest athlete ever produced by Poland, pictured with his celebrated coach, Tadeusz Starszynski, at the White City last summer. Starszynski, report Tom McNab (himself a 47'10"/14.58 performer in 1958) and Tony Ward, "controls the destiny of Polish triple jumping."

Fionnbar Callanan

with our Polish visit. We will therefore confine ourselves with dealing with three main aspects.

Firstly, facilities. When we asked Jan Mulak, Vice-President of the Federation in charge of the Training Commission and a powerful, dynamic figure in Polish athletics, how many tracks there were in Poland, he said: "Too many!" Too many tracks and not enough sports halls. Almost an identical situation to that prevailing in Britain. It was noticeable that Polish athletes did not compete in the European Indoor Meet in Dortmund. From a facility point of view Poland is no better off than we are in this country. Throughout our visit to Poland and to Germany we found the tracks in a soft condition and they had been that way most of the winter.

Secondly, coaching. The Coaching Scheme is better geared to the athlete, from the lowest level to the highest. The best coaches coach the best athletes as Federation policy. In Poland, a coach stands or falls by his work. He must work with the clubs, who give him a contract which is renewable. The club pays the coach—it is able to do this because it must have a sponsor, usually a Trade Union, large factory or the Army. From school to international competition every athlete has a coach to guide him. The stress is on enjoyment and all-round athleticism (the coach must qualify in all events, not just one) in the knowledge that only with this approach will large numbers be attracted to the sport. Not for the Poles the image of the iron-man with agonizing hours of work ahead of him; not for them the "be sick to succeed" policy. "Polish training" said Mulak when we talked to him in the offices of the *Lekka Atletyka* which he edits, "is the lightest in the world." It is systematically geared to a peak series of performances late in the season, when, often, British athletes are

leg weary from ten or even twelve months of hard, grinding training and competition. This, also, is Federation policy.

Thirdly, competition. To us this was the most enlightening aspect of the Polish track and field organisation. It *could* be the secret of their success. Every major club in Poland is in a graded league. The First and Second Leagues are composed of sixteen clubs each. In the Third League there are thirty-two clubs. In these Leagues there are three competitions per season, which are backed up by friendly fixtures between the clubs. At District Level (there are 18 Districts in Poland) there are A, B and C Leagues. Clubs in these Leagues compete much more frequently because the principle is followed that the lower the level the more frequent the competition. The theory behind this is that at the higher level the athlete has more opportunity to compete in national and international competition. At the District Championships each club is allowed three competitors per event. At the lowest level there are the "Thursday Open Meetings". These are open meetings held in towns and cities throughout the season, after work each Thursday. These meetings are for athletes not belonging to a club. Mostly young people take part. The clubs then go along to these meetings and invite the best competitors to join them. It may well be that, owing to a lack of coaches, some athletes cannot join clubs.

It must be stressed that these meetings are track and field meetings with every event catered for. It seems likely that it is this well organised competitive set-up that produces from 25,000 registered junior and senior, men and women athletes such standards, in 1965, as 46'6" for the hundredth best triple jumper; 198' for the hundredth best javelin thrower; 6' for the hundredth best high jumper and

10.8 seconds for the hundredth best 100 metre runner.

The sport in Poland has developed as a whole from its beginning in 1919 and from this has emerged the strong competitive set-up mentioned previously. Thus the organisation has always been there for the Poles to capitalize on the Olympic successes of field event performers Schmidt, Rut and world-record holder Piatkowski.

Seeing Schmidt, Sidlo and Komar in action helped us to assess that the Poles were indeed grading their training carefully towards a competitive peak and we shall watch with interest their standard of competitive fitness and ability in Budapest.

Finally we ended our trip at Dortmund with that tremendous European Indoor Meeting. Notable to us was that, throughout the meeting, field events took precedence over track events, even to the extent of having the first two hours of the afternoon devoted entirely to field. In our opinion it provided the exciting atmosphere which produced two world and one European jumping records. Commentary was crisp and incisive, mostly drawing the spectators' attention to events and participants, rather than a multitude of athletic facts and figures—most statistics were provided in the programme.

Finance allowing, this meeting could become a well-established date on the athletic calendar. Any attempt, though, to enlarge its scope into a fully-fledged European Championship would be unwise until many more countries have adequate indoor training/competition facilities and a good competitive structure.

How Bill Crothers Trains

by Fred Wilt

WILLIAM FREDERICK CROTHERS, Canada's Olympic 800m silver medallist, was born on December 24th, 1940, stands 6'0", weighs 153lb and started racing in 1956. A member of Toronto's East York Track Club, he is coached by Fred Foot. His best marks are 10.2 100y, 21.9 220y, 46.2 440y, 1:45.6 800m, 1:46.8 880y, 2:06.4 1000y (indoors), 3:00.6 $\frac{1}{4}$ mile (training) and 4:02.4 mile.

Pre-training warmup: Outdoors — jog 2 miles; 6x110y fast striding, walk briefly after each. Indoors—jog 880y; calisthenics.

Pre-competitive warmup: Jog 1 $\frac{1}{2}$ -3 miles (sometimes interrupted by walking and trips to toilet); 3-10x60-100y sprints, walk for recovery following each; calisthenics.

Autumn training: (during the period 10.9.65-5.11.65) Days one and three: 4-5 miles continuous run on grass or road at 5:50 per mile pace. Day two: 12-16x440y at 70, jog 220y after each. Day four: 8-12x880y in 2:30, jog 440y after each. Rest three days per week during this period.

Summer training: (example)

31.5.65: 4x220y in 23.4, 22.7, 22.5, 21.7—walk and jog 7 minutes after each.

1.6.65: 3x330y in 37.1, 37.1, 37.4—walk 3 minutes after each.

2.6.65: 3 $\frac{1}{2}$ miles easy run.

3.6.65: Rest.

4.6.65: 880y in 1:48.7 at Compton Invitational.

5.6.65: 30 minutes easy continuous run on grass.

6.6.65: 25 minutes easy run on grass.

7.6.65: 6x110y in 14.0 each, jog 110y after each; 600y in 1:09.9; 2x150y fast striding.

8.6.65: 4x110y in 14.0 each, jog 110y after each; 5x220y in 25.0, 24.0, 25.0, 24.0, 25.0—walk 220y after each.

9.6.65: 3 miles easy run.

10.6.65: Won 880y race at Toronto in 1:48.4 against Peter Snell (1:48.6).

Winter training: All indoors. Varies so radically that he cannot describe it. Follows no particular pattern.

Crothers does no weight training, and never trains more than once daily. His training starts at 5.45 p.m. and each workout covers up to 60 minutes total time. He rests only one week each year, this being the week immediately following the competitive season. He runs 3-4 cross-country races, 12 indoor and 15-20 outdoor track races annually. In terms of strategy and tactics, he runs only to win, prefers not to lead the entire race but will follow or set pace according to what best suits his competitive objectives and appears most advantageous to him and disadvantageous for his competitors.

INDIAN NEWS

Intensive coaching for 50 athletes selected by the Amateur Athletic Federation of India has begun at Patiala, culminating in a trial meet on June 4th/5th for the selection of the Indian team to compete in Hungary, the USSR and the Commonwealth Games in Kingston. The marathon selection trial for Kingston will be held on July 10th.

Six athletes have already attained the Commonwealth Games qualifying standards laid down by the Indian Federation and in addition to them those who qualify during the tour will be included in the team for Kingston. The team is expected to leave New Delhi on June 14th. It will stay in Hungary for two weeks prior to travelling on to the USSR under a cultural exchange programme.

Scientifically designed to meet the requirements of the discerning modern sportsman, Apollo tubular sporting equipment is light, strong, reliable and long-lasting. Time and again club committees have found that Apollo equipment is as valuable to the beginner as it is essential to the expert. This is why more and more leading coaches recommend Apollo.

GREAT "20" BY HILL

Wins Pembroke for 5th year

ONCE more Ron Hill's supremacy over the longer road races was shown to capacity in the Pembroke "20". The race, held at Huyton, Liverpool on May 21st, incorporated the Northern and Cheshire Championships races and was won by Hill for the fifth consecutive year. Despite a blustery wind the Bolton International went into the lead from the start and set a fast pace passing through five miles in 24.25. At ten miles Ron Barlow, the only man who might have given him some serious competition, dropped out and Hill just went further and further ahead.

"AW" TRIP TO MOSCOW

European Cup Finals, Sept. 15-17, 1967

WITHIN hours of learning of the venue for the 1967 European Cup Finals—Moscow—arrangements had been made for an "A.W." party to travel to the Soviet Union by air.

The 15 day holiday trip will include three nights in Leningrad, six nights in Moscow, and five nights at Yalta, the popular Black Sea coastal resort at the foot of the Crimean Mountains. Yalta has entertainment and sporting facilities galore, and is famous for its nearby forests, mountain valleys and waterfalls—the ideal holiday resort. Cost 95 gns., including air travel throughout; rooms with hot and cold water; three meals daily; five sightseeing excursions in Leningrad, three in Moscow, and three in Yalta; all transfers; bus transport to and from the stadium; and the services of guide/interpreters throughout.

Brochures and booking forms will soon be available from Wayfarers Travel Agency Ltd. (A.W.), 20 Russell Square, London, W.C.1.

Race Walking

By L. W. WOODCOCK

ANOTHER McCullagh success: Commonwealth walker Peter McCullagh (Metropolitan WC) completes his Rhodes Scholarship at Oxford this term and will then be returning to Australia. Before arriving in this country three years ago he had already begun to catch the eye as a more than useful walker and had been placed in Australian Championships. On arrival here he soon settled down to our conditions and became a most useful member of the Metropolitan Club. He has saved his best performances for the last months of his stay in England and last Saturday had perhaps his most important success. At Leicester in the popular "Leicester Mercury" Open 20 Miles he won with a new course record of 2h. 41m. 22s. He shared the lead with International John Paddick (Royal Sutton Coldfield WC) until about the twelve miles point. Here he broke away in no uncertain manner and opened up a big lead to win by 3½ minutes. Another Commonwealth walker to catch the eye was New Zealand's ex-Olympic Champion Norman Read (Steyning AC). He had a great scrap with our own gold medallist, Don Thompson, until approaching 15 miles when he slowly drew away to finish twelve seconds ahead. The local Club won the team race from Metropolitan with Sutton Coldfield third.

The Brighton Road: Since my report and comments about the future of events on the Brighton Road comes news of the R.R.C. decision to promote their 1966 Open London-Brighton Run as planned. However, they are to investigate an alternative to the London-Brighton race for 1967 onwards and the police have been so informed. Special conditions are being introduced for this last race and any contravention will result in the immediate disqualification of the athlete involved. We now await news of the decisions to be reached by the two promoters of walking events over this famous course.

The Inter-County "7": The disqualification of Paul Nihill (Surrey) at White City last Saturday surprised several of the press boys who do not know the technicalities of race walking. I was not present myself and would only comment that the decision to disqualify shows the strength of our judging. It takes courage to "pull" a National Champion but Nihill will no doubt look upon this decision as adding something to his experience and will work hard to correct any fault in his style. The winner was International Peter Fullager (Kent), who, I believe, recorded his best time for this distance. Both he and the second walker, Ron Wallwork, recorded fast times. I was surprised to see Malcolm Tolley (Yorks)

doing so well after his recent "lay-off" caused by a leg-strain resulting from trying to race on blistered feet in a recent Northern event before his feet had fully recovered.

Thrilling Racing at British Games

Melvyn Watman reports from the White City

AS generally expected, in view of the proximity of the GB v. USSR match and indeed — from a selection point of view — the Commonwealth Games, a high standard of performance was achieved at the Whitsun British Games . . . in the track events. With depressingly few exceptions, the field events were of a disappointing calibre, though.

First Day, May 28th

It is always a thrill to witness the birth of a new star and the faithful few (4,000) at the White City, augmented by a few million television viewers, were treated to the sight of a completely new name—to most Sassenachs at least—making good in his first international race. I refer, of course, to Graeme Grant, who revealed signs of immense potential in the way he demolished some classy foreign opposition as he tore after John Boulter in the invitation 800m at these *News of the World* sponsored British Games. Grant, who turned 20 on May 24th, is built along Snell lines at 5'11½" and 175lb and, like the New Zealander was at his age, is a trainee quantity surveyor. He is a member of Dumbarton AAC and is trained by national coach John Anderson. At 17 (1963) his best times were 1:59.8 for 880 and 4:21.1 for the mile; in 1964 he clocked 1:55.7 and 4:12.5; last year he topped the junior 880 lists with 1:52.0 and ran a 4:11.7 mile besides winning the Scottish senior half-mile title. Prior to Whitsun his fastest half was 1:51.0, on April 30th.

That 800m was a richly satisfying race. John Boulter, aware that selection for the USSR match would depend upon his recording a really fast time, chose the wisest course of action—in his own words, to "run like hell". Leading throughout, he covered the first 400m in a swift and fluent 52.7 and drew well away from the overseas contingent of Herbert Missalla, Imre Nagy and Maurice Lurot (all sub-1:48 operators at their best) as he toured the second lap in 55.2 for an overall time of 1:47.9, a tenth outside Europe's fastest this season by Kemper. Grant, whose objective had been merely to better 1:50, stormed past Missalla and closed on Boulter to finish only two yards down in 1:48.2—second best ever by a Scot and more than sufficient to win him a return air ticket to Kingston.

Two of the inter-county events produced marks of close to world class. Peter Warden, striding fifteens in a most tenacious manner, served notice to Messrs Cooper, Hemery, Sher-

wood and other interested parties that he has no intention of relinquishing his place in the national team. He defeated Robin Woodland by an enormous margin to equal his personal best of 51.4, a time bettered in Europe this season only by Frinolli (51.0m).

The other highspot was an intriguing three miles won by Geoff North in 13:18.8. It was a fast race throughout, with North the leader at the mile in 4:25.6 and Mike Freary heading the field at the half distance in 6:40.2. Bill Wilkinson took command on the next lap and at 2 miles (8:55.6) he led from Freary, North, John McGrow and Tim Briault—each a stride apart. McGrow fell back on the 9th lap and Briault was forced to part company on the 10th. Wilkinson continued to hammer out the pace and a penultimate lap of 66.6 opened up a five yard gap at the bell (12:18.6) over Freary and North. As Wilkinson accelerated along the back straight it became clear that Freary, who had set a personal best of 13:24.2 ten days earlier, had nothing to offer . . . and equally obvious that the younger of the North brothers had plenty of running left. North caught his man at the start of the finishing straight and passed him 40 yards from home to score by five yards in a time that shattered his previous best by 13.6 sec. Wilkinson also bettered Bruce Tulloh's championship record of 13:20.2, while Freary and Briault posted worthy personal bests. Mike Tagg's 13:50.4 is the fastest ever recorded by a British 19-year-old.

Briefly . . . Lynn Davies gained his third consecutive 100-long jump double. Eventful, too, for he took only two jumps owing to a bruised heel and in the sprint the race was originally awarded to Barrie Kelly, only for referee Ron Goodman to reverse the verdict after consulting the photo finish evidence . . . Adrian Metcalfe continued his successful comeback with a zippy 200m win in 21.4, only a fifth outside his best and considerably faster than 20.9 performers Paul Genevay and Harald Eggers in the other race. Dave Jones, apparently out of form, had been suffering all week from neuralgia . . . A routine 1500m victory for Witold Baran, who sped around the final 300m in 39.8 with Derek Graham distinguishing himself by passing Siegfried Herrmann 70 yards from the end . . . Ray Roseman turned in another of his crowd pleasing front-runs in the mile heats, winning by a spectacularly extravagant margin of over 20y from John Whetton in 4:04.1. Alan Simpson won his heat in 4:08.5, covering the final two laps in 58.2 and 58.3 . . . A pleasing hammer breakthrough

at 29 by Peter Seddon, who exceeded 180ft four times and ran Howard Payne relatively close with a frustrating 189'11" . . . History repeats itself department: on May 28th, 1955 Mick Wheeler won his inter-county 440 semi in 48.3; on May 28th, 1966 Mick Wheeler won his inter-county 440 semi in 48.3.

Second Day, May 30th

There was much for the 14,500 spectators to enthuse over on this warm and sunny afternoon—notably Alan Simpson's fifth sub-4 minute mile, a dramatic six miles, a high-class half-mile, a typically sophisticated steeplechasing display by Maurice Herriott and the fastest 3000 metres in the world this year . . . but what really brought the house down was Peter Warden's eyelash victory over Mel Cheskin in the 220 final—an astonishing result that reflects great credit on one of Britain's guttiest athletes. But, for prolonged excitement, it was the 6 miles that led the parade.

Mel Batty led the tremendous field through the first mile in 4:36.0; then Jim Alder showed ahead for a couple of laps before Allan Rushmer took over to pass 2 miles in 9:16.8. The first shock came when Martin Craven (best time of 29:47.4) made a break with a 67.8 9th lap and continued to lead until 3 miles (14:02.8). Shortly afterwards, Craven dropped back rapidly, leaving a bunch of eight distinguished names to fight it out: Alder, Jim Hogan, Rushmer, Ron Hill, Gerry North, Bruce Tulloh, Martin Hyman and Mike Bullivant. The pace slowed to about 72 per lap as the runners manoeuvred themselves to the best advantage. Alder led for a spell, then it was Hill out in front; Hyman pranced ahead for a while, only for his old partner Bullivant to dictate the proceedings. Alder was the first to falter (at 4M in 18:48.4) and he was followed by North a few laps later. Five miles came up in 23:36.4 with Bullivant just ahead of the remaining five. We did not have long to wait to discover who would break for home first: with 900y left Hogan dashed ahead with a penultimate lap of 66.4. Unhappily, at the start of the 23rd lap, Rushmer and Hill got tangled up (quite by accident) as they stormed off in pursuit with the result that both fell to the track. By the time they had scrambled to their feet Hogan and Tulloh were well away. The bell tolled in 27:05.2, with Hogan and Tulloh a clear 25y up on their luckless rivals. Hogan continued to lead until, 270y out, Tulloh produced an electrifying sprint that carried him 25y away from Hogan in, it seemed, the space of 100. Meanwhile Hill and Rushmer were making up lost ground on Hogan at a phenomenal rate and just before the line they passed him simultaneously (Hill on the outside, Rushmer—desperately—on the inside). Tulloh won in 28:04.8—his first major success at the distance for four years—some 40y ahead of Hill, who scraped home inches ahead of the 22-year-

old Midland champion. Certainly an eventful race!

Simpson's fast time in the mile was due largely to Ray Roseman's pace setting (59.8, 2:00.1). With only John Whetton to worry about, Simpson struck very early—500y out—and during the course of a 56.9 last lap he stretched his advantage from five to nearly 25 yards. Curious how Whetton, Simpson's undoubted peer on the boards, cannot seem to live with him outdoors. The half was much more of a race. Chris Carter employed his usual tactics of setting a strong pace for the first lap (53.4), relinquishing the lead on the third furlong and finishing like a fire engine on its way to a blaze. His time of 1:48.1, easily a personal best over the English distance, is magnificent for this early in the season, while in his wake came absolute lifetime records by Mike Varah, Walter Wilkinson, Bob Adams (who improved from 1:52.7 to 1:49.6) and John Gingell, while Alan Dean was only just outside his. Similarly, in the steeplechase (where Herriott's 8:43.2 was over 12 sec. faster than he has ever previously recorded in May) Brian Lee, John Linaker, Gerald Stevens and Chris Perry among others broke new ground.

Briefly . . . Despite a hamstring injury to his leading leg which needed treatment between heat and final, Dave Hemery made a most favourable impression in the "highs" (he clocked 14.1 in winning the ICAAAA title on

the Saturday, and 14.0 the previous weekend) and many thought he had in fact pipped Laurie Taitt . . . Lajos Mecser's brilliant 3000m time of 7:51.2 is not only the world's fastest so far this year but a Hungarian record and the best ever in Britain; obviously he is going to be a hard man to beat in the 5000m on his home track in Budapest. Good run by Lachie Stewart, with a Scottish record of 8:01.0 . . . "Ming" Campbell, once he had recovered from a poor start, generated as much speed in the 100m as Wieslaw Maniak and had little trouble in defeating alleged 10.2 man, Harald Eggers . . . Tim Graham's 46.9 400m was his fastest since Tokyo . . . The tie between Middlesex and Surrey for the county championship duplicated the result of 1935.
